COMAR whisper hydraulic powerpacks
setting the new standard in
quality and performance

Comar have been developing test equipment for over 30 years for the aerospace, marine and automotive industry and a reoccurring problem we faced on test equipment was the hydraulic supply packs having to be too far away from the test equipment losing performance and making system integration and installation much harder.

So we set our design engineers to task with the following brief 'Design a Hydraulic Powerpack system that meets the following criteria'

- A system that is easy to customise for different applications
- Conforms with HSE noise levels so we could position the powerpacks
 - Directly next to the test equipment
 - Giving excellent air flow for cooling
 - Maintenance friendly for servicing.
 - Streamlined as possible
 - Suitable for all fluid types
 - Easily Branded for different Customers
 - Made from quality components
 - Free standing
 - Easy to position and move

After several years of developmental process we are pleased to release to the market
Whisper Powerpacks MkII

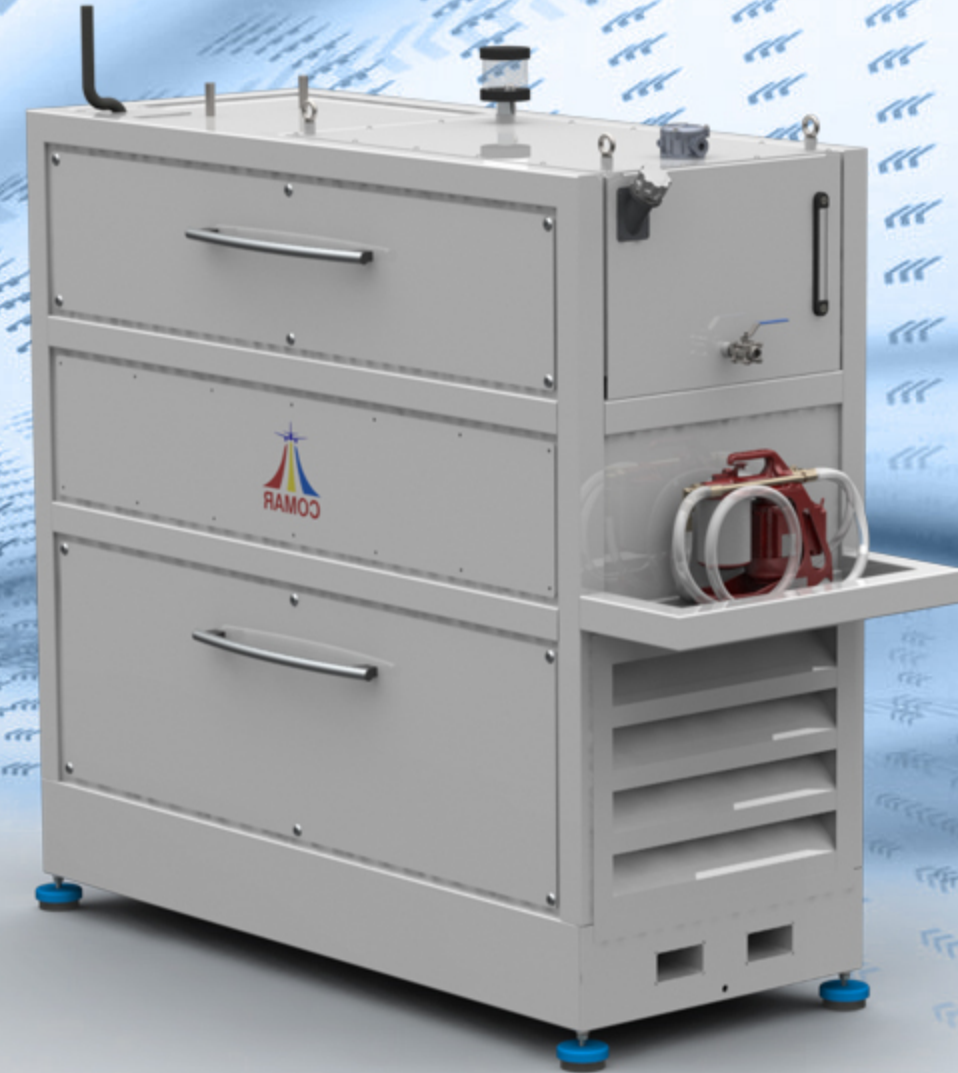

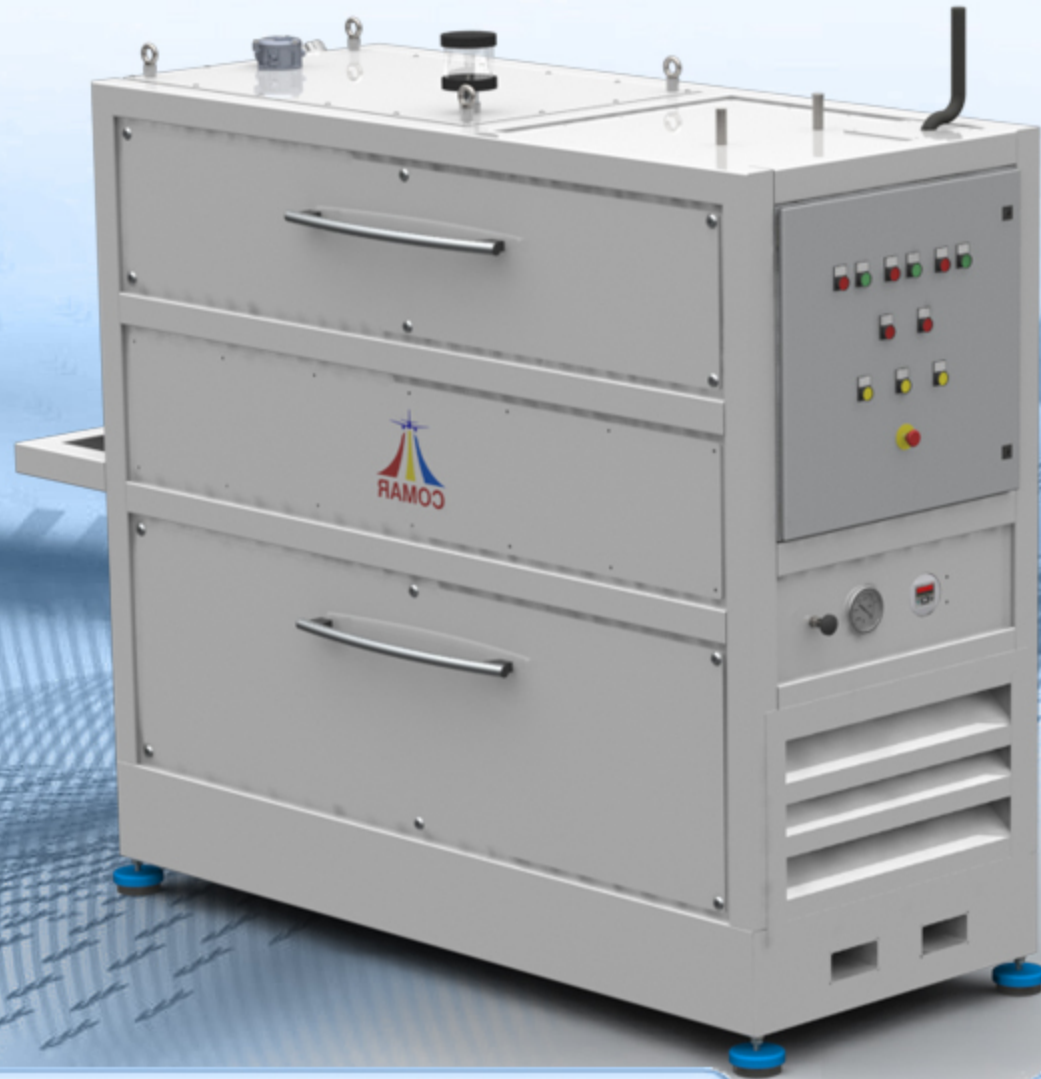

Whisper
POWERPACK

HYDRAULIC TANK HAS LIFTING POINTS PROVIDING EASE OF MAINTENANCE AND REMOVAL

CONTAMINATION CONTROL FILTERS & BREATHERS PROVIDE EFFICIENT REMOVAL OF UNWANTED PARTICLES

VISUAL AND ELECTRICAL LEVEL GAUGES USED TO SHUT DOWN SYSTEM AT LOW LEVELS

QUICK RELEASE REMOVABLE PANELS USED PROVIDING GOOD ACCESS FOR MAINTENANCE

FORK LIFT POINTS BUILT INTO FABRICATION MAKING TRANSPORT AND MANOEUVRABILITY EASY

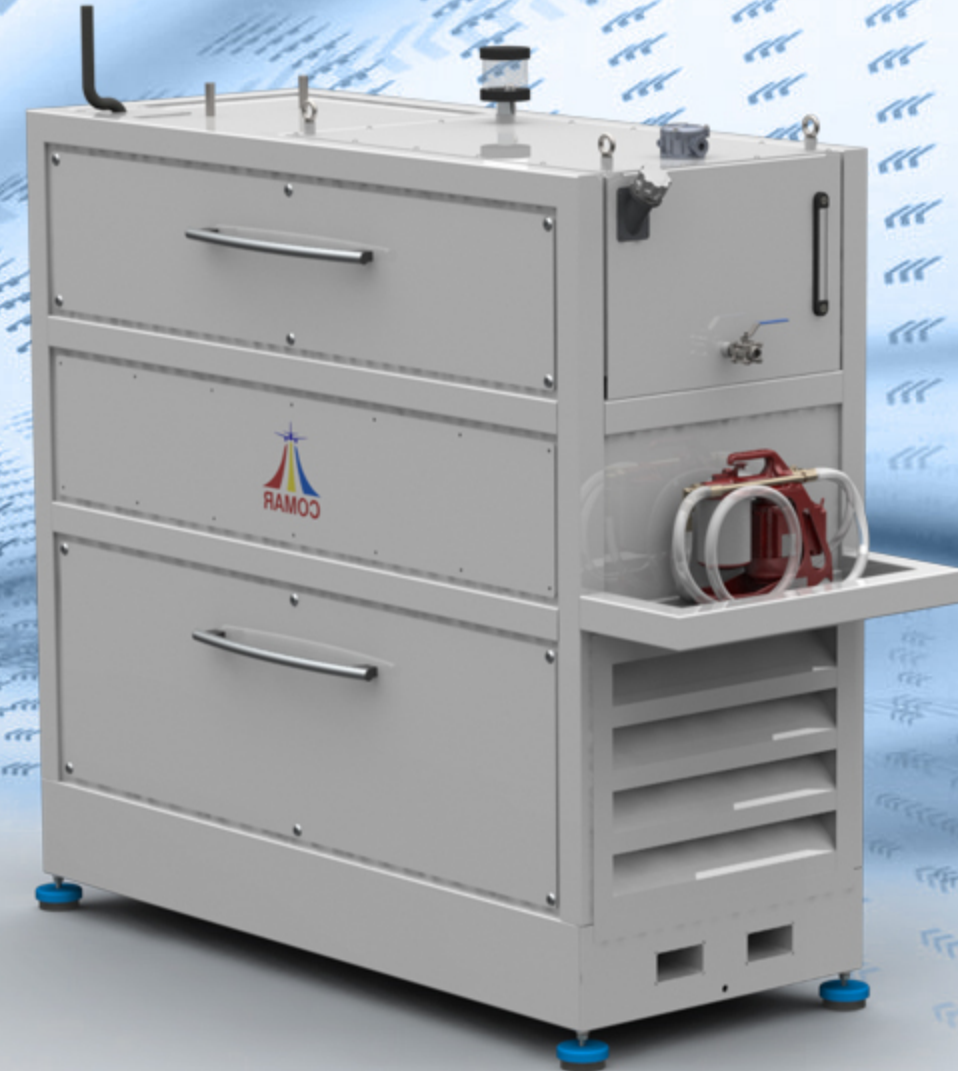

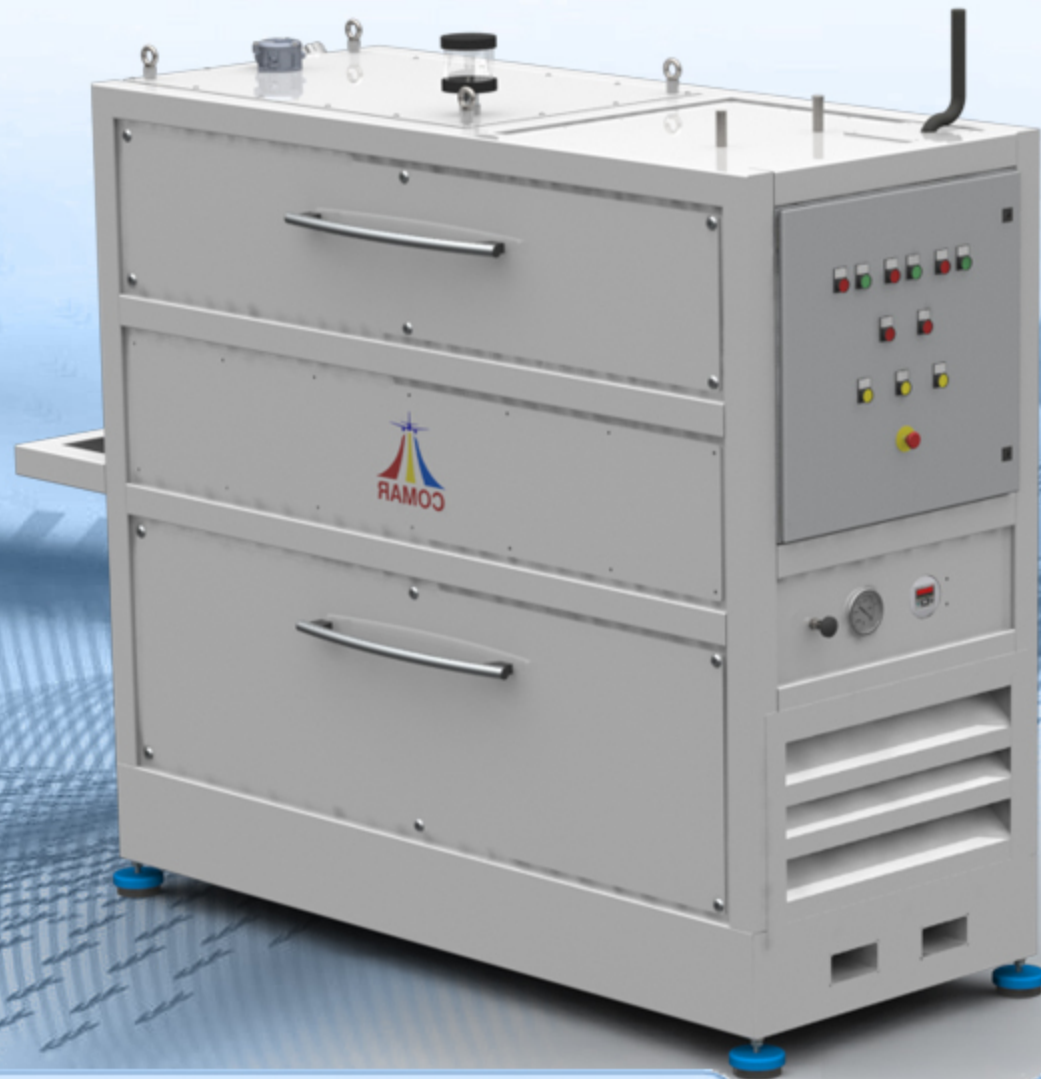

ACOUSTIC LOUVRE PANELS USED FOR SOUND PROOFING AND AIR FLOW THROUGH THE PACK

whisper
POWERPACK

ALL PANELS ARE SOUND INSULATED WITH SOUND PROOF PANELS GIVING UNDER 75 DECIBELS

SUPPLIES ENTER FROM THE TOP SUCH AS ELECTRICAL AND WATER COOLING

FILLER PUMP WITH INTEGRATED DRIP TRAY FOR EASY REMOVAL AND FILLING OF TANK

ANTIVIBRATION LEVELLING FEET PROVIDING DAMPING AND GOOD STABILITY

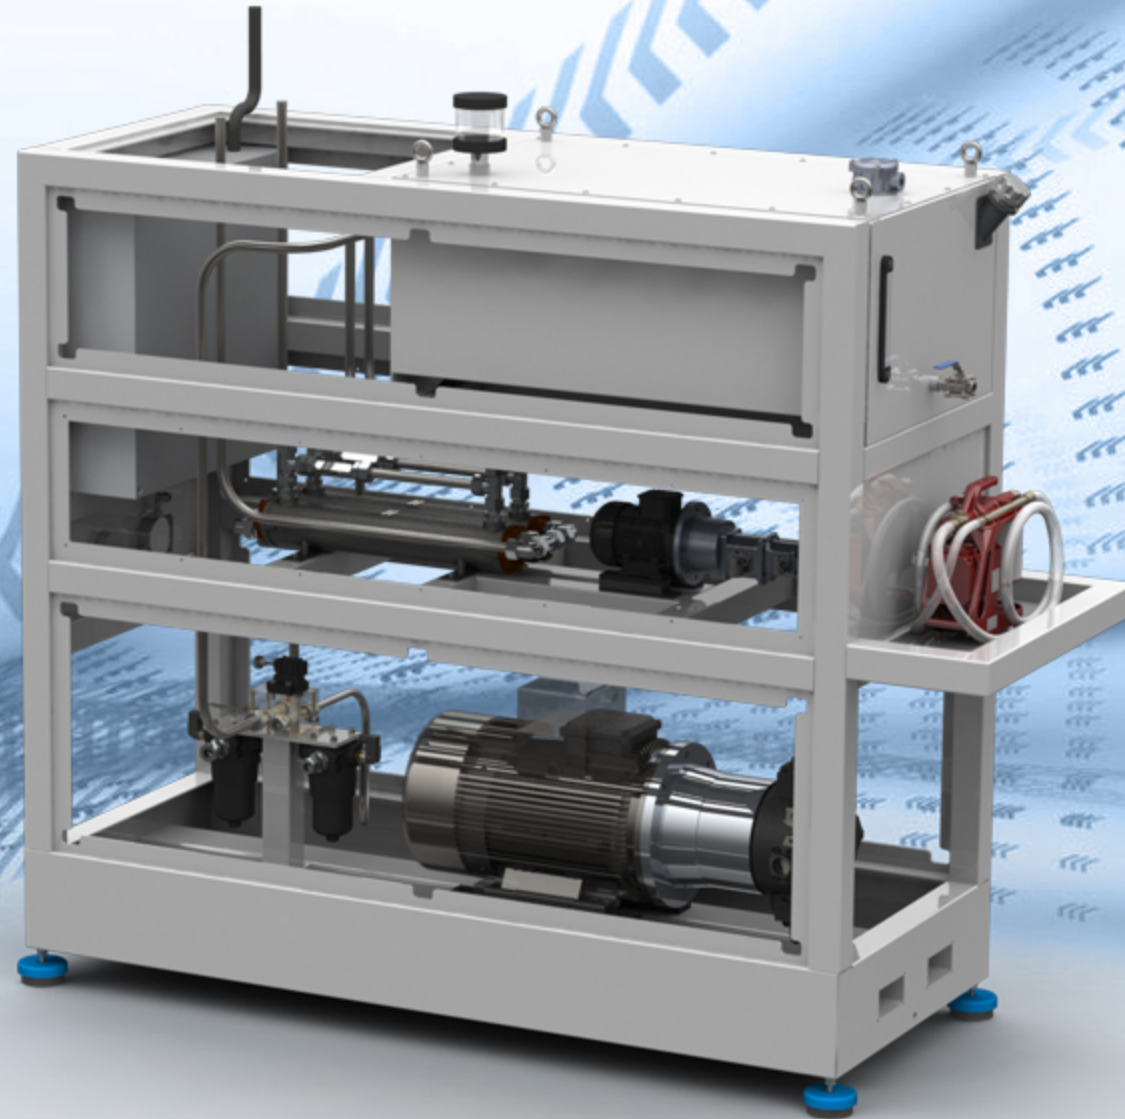

ELECTRICAL MONITORS MEASURE AND DISPLAY PARTICLE CONTAMINATION MOISTURE AND TEMPERATURE LEVELS

ELECTRICAL STARTER PANEL FULLY INTEGRATED INTO POWERPACK WITH E-STOPS AND OPERATIONAL BUTTONS

ALL PANELS ARE REMOVABLE GIVING A LARGE AMOUNT OF ROOM FOR MAINTENANCE

ELECTRICAL STARTER PANEL FULLY INTEGRATED INTO POWERPACK WITH E-STOPS AND OPERATIONAL BUTTONS

INTEGRATED DRIP TRAY/BUND WHICH CAN HOLD THE COMPLETE VOLUME TO TANK

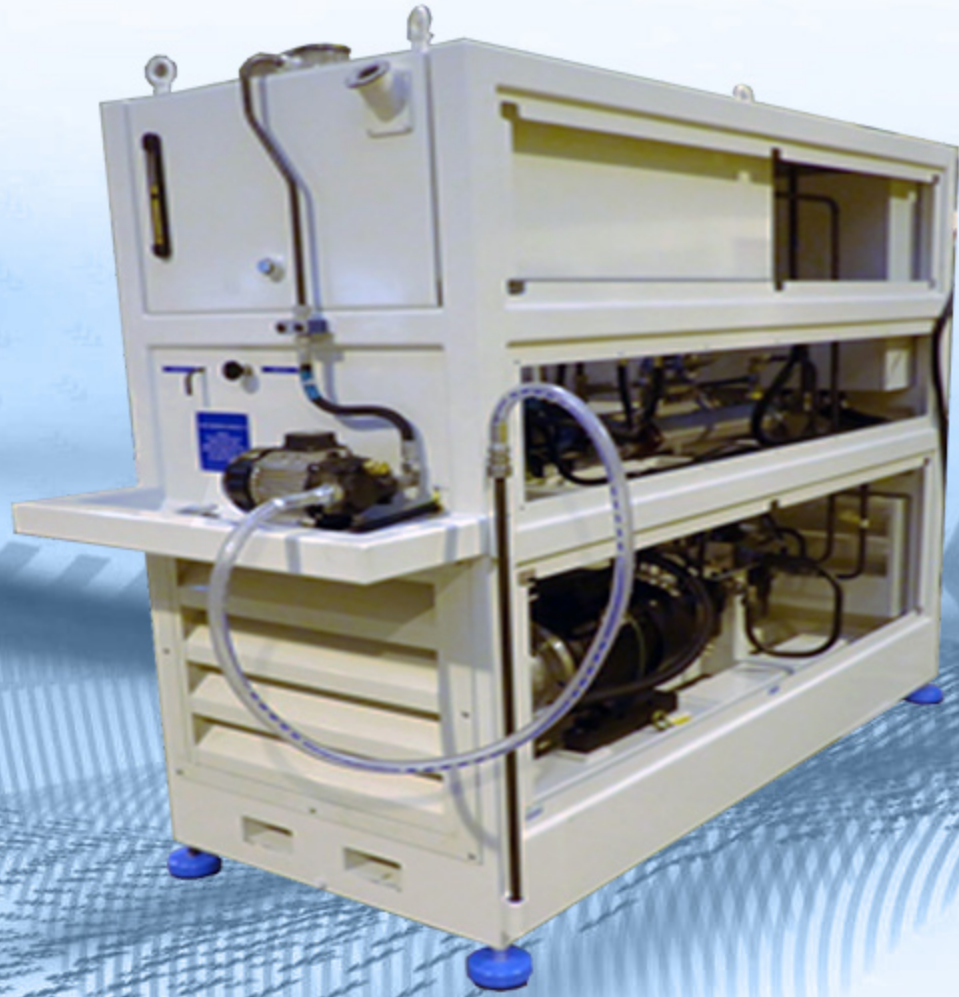

EACH HYDRAULIC SYSTEM IS TAILORED TO YOUR REQUIREMENTS IE PRESSURE/FLOW/INLETS/OUTLETS

POWERPACK COLOUR CODED TO CUSTOMER REQUIREMENTS - SKYDROL PACKS ALL STAINLESS

MANY ADD ON OPTIONS AVAILABALE AND LARGER UNITS FOR THE MORE COMPLEX SYSTEMS
